PERSONAL PROJECTS

Service Schedule

Description: Enhancing service department operations by tracking customers' motorcycles. The platform streamlined communication between service teams and clients, ultimately improving satisfaction scores and operational transparency.

- **Next.js**
- **Tailwind CSS Styling:** Implemented custom and reusable components for a consistent and modern UI.
- **User Experience Focus:** Designed features to help service staff easily monitor service status and communicate updates to customers.
- **Operational Efficiency:** Improved customer satisfaction by addressing communication bottlenecks in service departments.

-

PROFESSIONAL EXPERIENCE

Apiture

Austin, TX

Software Engineer I

July 2021 – Jan. 2025

- **Revenue Growth:** Transformed a web hosting product from a net loss to generating \$400K in revenue within its first full year.
- **Workflow Optimization:** Led a project to transition a product's editing workflow from reliance on customer support and software engineers to a client-managed CMS. This initiative reduced customer support contacts and enhanced the user experience by empowering clients with self-service capabilities.
- **Process Development:** Designed a comprehensive development questionnaire and guidelines to streamline the website redesign process, ensuring projects stayed on track and met client needs.

- **Theme Development:** Created 9 custom WordPress themes, modernizing outdated client websites with improved designs and enhanced accessibility standards, while offering clients a range of tailored options to meet their branding and functional needs.
- **Client Collaboration:** Managed client relationships through email and Zoom, providing guidance on theme branding, content migration, and accessibility standards.
- **Visual Design:** Designed custom images/svg/icons to showcase client products and services, enhancing website aesthetics and user engagement.
- **Documentation:** Delivered clear and comprehensive documentation to clients for easier post-launch website management.

uShip

Austin, TX

Member Support Specialist

June 2018 – July 2021

- Fielded ~800 calls per month to educate customers on products and services and offer troubleshooting support for website or account problems, achieving 93% satisfaction rate across tenure
- Earned bonus for each of first 3 quarters in 2020 for consistently high performance in identifying/creating JIRA tickets for bugs, collaborating with engineering teams for resolutions, and balancing support calls from customers and/or carriers

BigCommerce

Austin, TX

Technical Client Success

Sept. 2017 – June 2018

- Identified and resolved code errors for customer ecommerce sites using Atom and JavaScript, successfully completing 15-20 tickets per day by phone or email and minimizing customer downtime to ~30 minutes or less
- Improved UX of merchant website by assisting in design of website functionality, resolving and optimizing payment platform API for PayPal, Stripe, etc.

McMaster Carr

Santa Fe Springs, CA

Supply Side Operations

Sept. 2008 – Feb. 2017

- Restocked section of high-volume warehouse containing 400K+ items and managed carrier system tracking & logistics communication for inbound materials
- Reduced work-related injuries and accidents by collaborating with internal stakeholders to develop safer work environments
- Provided shipping operation oversight and led design of live-load trailer handling to unload 12-25 trucks and 100K+ line items per day, achieving a truck-to-shelf time of 1 hour or less
