Profile

Web developer located in Austin Texas.I am excited to start my career as a web developer because I want to build, improve user experience and be as creative as possible. What sets me apart from others is my drive and understanding of the management role and now coupling it with web development skills to build robust websites and software.

Projects

Jobiato - Full Stack application that utilizes Indeed API and Meetups API to allow a user to search for a job position and at the the same time show a related Meetup to that same job search. The user has the ability to save job post and it is stored using the Firebase DB. Github was utilized for the entire project with working locally and executing Pull Request for the finalized product.

The Good$ - Full Stack application that allows people to rent out items that they own in Austin, TX. An app that encourages recycling of goods and allows people to save by renting what they need instead of buying it. Utilizes Sequelize, Handlebars, Google Maps API and Stripe payment systems.

Professional Experience

McMaster-Carr, Santa Fe Springs, California

Supply Side Operations, 2008 - 2017

Supply side operations with responsibilities of carrier system tracking/logistics communication concerning inbound material to supervisors for upcoming workday scheduling purposes. Ensure stock communication is accurate and ready for business every day.

- § Lowered work-related injuries and accidents by working among internal stakeholders to seek and create safer work environments.
- § Navigate a complex warehouse facility to keep accurate stock and provide shipping operation oversight.
- § Led in the design of live load trailer handling, resulting in properly executed offloading and timely deliveries.

Education and Credentials

University of Austin, Texas (June-Sept 2017)

UT Austin Full Stack Coding Boot Camp: An intensive 12-week long bootcamp dedicated to designing and building web applications. Skills learned consisted of HTML5, CSS3, JavaScript, jQuery, Bootstrap, Firebase, NodeJs, MySql, MongoDB, Express, Handlebars JS, & React Js.

Bachelor of Arts in Business (2011-2016)

Vanguard University of Southern California – Costa Mesa, California
